

ADA Technologies a 2005 Top Company Award Winner

DENVER (Sept. 13, 2005): ADA Technologies, Inc. was selected as a winner in the 2005 Top Company of the Year competition.

A research, development, and commercialization company, ADA Technologies specializes in the creation and conversion of innovative technologies to commercial successes.

Sponsored by ColoradoBiz magazine and UMB Bank, the Top Company of the Year competition has been recognizing Colorado businesses for the past 18 years. Companies are judged on financial performance, operational excellence, and community involvement. One winner is selected in each of nine categories. ADA won in the Technology/Media/Telecommunications category.

“This is quite an honor for all of us at ADA Technologies,” said company President Cliff Brown. “Thanks to our incredibly talented and creative employees, we have been able to build a financially-strong company that does some very exciting things. Our technologies impact people’s lives the world over.”

Located in Littleton, Colorado, the 35-employee company focuses on technologies that respond to vexing problems threatening health, security, the environment and quality of life around the world. Some of its most promising technologies address problems related to mercury and arsenic contamination, homeland security and defense, landmine and explosives detection, and orthotic and prosthetic devices.

The company has been awarded numerous patents for its cutting-edge technologies and has many more in various stages of development. Over the past four years, it has experienced 30 percent average annual growth.

According to ColoradoBiz, “Top Company is the most rigorous, important, and rewarding event of its kind. Winners...join a who’s-who list of Colorado’s most notable businesses and enjoy the commendation and recognition afforded the communities’ finest organizations.”
