

ADA Ranks 6th of 25

DENVER (August 17, 2006): ADA Technologies, Inc. is one of the “25 Best Companies to Work For in Colorado 2006,” ranking sixth out of 12 finalists in the medium size companies category. The ranking of the finalists was announced at an awards luncheon on August 3.

According to the Society for Human Resource Management (SHRM) Colorado State Council, the program sponsor, the competition “honors the companies in Colorado that show a dedication to their employees’ growth and quality of life.”

The competition was based on results of company-wide employee surveys and an in-depth analysis of the company’s benefits program conducted by ModernThink, an employee management consulting firm. ADA’s collaborative environment, employee incentives, education programs and teleconferencing capabilities supported the firm’s selection as a finalist in the competition.

“ADA’s most important asset are the members of the company. We provide an excellent slate of benefits as well as promote a culture that is collegial and recognizes the value in a good work/life balance,” said ADA President Cliff Brown.

In September 2005, ADA was named Colorado’s Top Technology Company 2005 in a state-wide competition sponsored by ColoradoBiz magazine and Deloitte.

Littleton, Colorado-based ADA Technologies, Inc. is a research, development, and commercialization company that specializes in creating and converting innovative technologies to commercial successes. ADA has been awarded more than 125 research grants totaling more than \$40 million and holds numerous patents for its technologies, which focus on solving problems threatening the health, security, environment and quality of life worldwide.
