

ADA Technologies Named "BEST COMPANY TO WORK FOR" by Society for Human Resource Management

DENVER (August 1, 2007): ADA Technologies, Inc., of Littleton, Colorado, has again been named one of the "Best Companies To Work For" in Colorado by the Society for Human Resource Management, Colorado State Council, at its second annual awards luncheon July 31st. ADA was ranked 8 among 20 medium-sized companies honored with this award. The classification of 'medium-sized company' is set by the number of employees – 25-249.

ADA is an early stage technology development and commercialization company. The competition is sponsored by ColoradoBiz magazine and Jobing.com and is modeled after Fortune magazine's "100 Best Companies to Work For in America."

"We are pleased and honored to receive this award for the second year. Keeping our place in the top 10," said Cliff Brown, president of ADA. "We constantly seek to enhance the quality of our science, and continuously improve our workplace. We hire excellent employees, and we want them to want to come to work. Keeping ADA's culture targeted to that end benefits us all."

The rank of each of the winning twenty medium-sized companies and ten large companies was announced at a luncheon in Lakewood. The awards were presented by emcee Gregg Moss, business reporter for Denver's NBC affiliate 9NEWS/KUSA, at a luncheon in Lakewood. The awards program was created in 2006 to honor companies in Colorado that show dedication to their employees' growth and quality of life and to promote the state's best employment opportunities to attract new workers.

"ADA promotes a collaborative environment where employee's contributions are recognized and rewarded in many different ways." Brown said. "We see the value of having a good work/life balance and are continually seeking input from our employees to ensure we have programs in place that are of benefit both to our employees and to the company."

In September 2005, ADA was named Colorado's Top Technology Company in a statewide competition sponsored by ColoradoBiz magazine and Deloitte LLP.

ADA Technologies, Inc. is a research, development, and commercialization company that specializes in creating and converting innovative technologies into commercial successes. ADA has been awarded more than 130 research grants totaling more than \$40 million and holds numerous patents for its technologies, which focus on solving problems threatening the health, security, environment and quality of life worldwide.
