

ADA Hires Lab Manager

DENVER, Colo. (April 21, 2009): Virginia Schmit has joined ADA Technologies, Inc. (ADA) as Laboratory Manager in the company's Laramie, Wyoming office. She is part of a team focused on development and commercialization of ADA's Trace Detection Technology. Schmit is the fifth new employee to be hired in ADA's Wyoming office since January 2009.

Prior to joining ADA, Schmit worked for the Centers for Disease Control in Fort Collins. Her experience also includes extensive laboratory experience at Colorado State University and work with the U.S. Department of Agriculture and the Florida Department of Environmental Protection. She holds a Master's degree in Cell and Molecular Biology from Colorado State University and a Bachelor's degree in Animal Science from California Polytechnic University.

ADA's Trace Detection Technology improves detection of explosives and narcotics for military and homeland defense applications. The technology also has global security applications, including uses in vehicle inspection stations, with robotic platforms, airport luggage screening, travel document screening and as an aid to first responders.

About ADA Technologies, Inc.
